Hubbard Glacier, Alaska, USA

Hubbard Glacier, Alaska, USA 1985-1986

An unusual event on the coast of Alaska was observed with satellite imagery in 1986. A glacier slid down a valley and blocked a fiord from the rest of the bay. The fiord then turned into a temporary lake. The water's level rose 25 meters before the glacier dam gave way a few months later.

Date	Satellite	Bands	Res	Path	Row
Aug. 7, 1985	Landsat 5 TM	4,3,2	30 m	62	18
Sept. 11, 1986	Landsat 5 TM	4,3,2	30 m	62	18

Earthshots: Satellite Images of Environmental Change

The U.S. Geological Survey Earth Resources Observation and Science (EROS) Center archives data from the Landsat satellites (1972–present). Earthshots presents environmental changes using Landsat images.
